Entered at the New York Post Office as Second-Class Matter

A monthly magazine devoted to Naturopathy, the art of Natural Healing and the Science of Physical and Mental Regeneration, on the basis of Self-Reform and Popular Hygiene, Hydrotherapy (Priessnitz, Kneipp, Lahmann and Just Systems), Osteopathy, Chiropractic, Mechanotherapy, Heliotherapy (Sun, Light and Air Cure), Diet, Phytotherapy, Herbalism, Physical and Mental Culture, to the exclusion of Drugs and Non-Accidental Surgery.

RESPONSIBILITY FOR CONTRIBUTED ARTICLES. The Editor does not assume any responsibility for signed articles. It is the desire of the Editor to give the widest possible latitude for discussion to those who may have different ideas concerning drugless matters, and in consequence we shall publish articles from time to time with which we may differ radically. So far as our space permits, we would like to conduct something of an open forum for the free discussion of things Drugless without regard to the views of any one person or institution. Therefore, if you have any objections to anything that appears in this journal, place the blame where it belongs, and don't be afraid to express your opinions in any matter which relates to drugless methods.

SUBSCRIPTIONS for all countries of the world, \$2.00, postpaid, per year; invariably payable in advance. Single copies at 20c. Subscriptions may begin at any time. Back numbers and back volumes may be had. Back volumes, English, from 1900 to current volume, each \$1.50 postpaid. German back volumes, from 1899 to 1907, each \$1.50. Single back copies, English and German, 20c. each.

In this current issue we bring for the time the German section *Der Naturopath Grundheilsratgeber*. The 16 pages here used for the German readers will be now also devoted to English articles. Our German readers who have been keeping the magazine on account of the German department should send us a postal card that only read German and we will send them *Hausdoktor* instead. *Der Hausdoktor* is a very fine magazine for our German readers. It will be enlarged in the near future and it caters principally to the German mind and to the advanced ideas of the German readers in regard to rational healing and living. It is a broad magazine that has no axe to grind with anybody and is published in the interest of the common good, or social and individual welfare, for regeneration of mankind, in fact, the trinity of man as embodied in body, mind and soul. We hope that our German friends will all be kind enough to inform us if they wish the German magazine. However, with this issue, the German department says "good-bye." I am sure many liked this department, as in many families some read German and the magazine had a larger field of usefulness than many imagined. We have been receiving so many letters from English readers that they don't want the "Dutch" section and a good many of these letters showed prejudice and narrowmindedness pure and simple, as they cannot see the point that the German language is as good a language as English, and that the German readers did a good deal in supporting this magazine, in fact, the English edition is only the daughter of our old German magazine and I don't think it behoves the children to speak disrespectful of their parents. On the other hand, we are glad that we have more space to publish the numerous articles which are sent in from contributors. Therefore, once more "Auf Wiedersehen" to the German readers, and the editor thanks very much all those who have supported this department and is especially glad to have received so many encouraging and sympathetic letters through the German Department.

X PATHIC PHYSICIANS OF CALIFORNIA

Following is a digest of a memorial addressed by the Association of Naturopathic Physicians of California to the people of California, Governor Johnson, and members of the Assembly and Senate:

This association, legalized under Senate Bill No. 26, in February, 1909, is the only school of healing recognized by the state of California that is not represented on the State Board of Medical Examiners, which now consists of allopaths, homeopaths, eclectics and osteopaths. This is taxation without representation. We ask, as simple justice, the placing of two representatives of our school on the board.

"Naturopathy," or the nature cure, embraces all rational methods of aiding nature to eliminate disease from the system, such as diet, exercise, rest, hydropathy, spinal manipulation, electricity, mental suggestion, etc.

THEY KNOW HOW TO FEED CHILDREN AND GET GOOD RESULTS

There are more nervous persons made so by undigested food lying in the stomach than the average individual would suppose.

If food remains undigested in the stomach, it begins to ferment, set up gas and a large portion is thus converted into poison.

That's why imperfectly digested food may, and often does cause irritation of the nerves and stupor of the mind—brain and nerves are really poisoned.

"My daughter had complained for some time of a distressed feeling in the stomach, after eating, which set me thinking that her diet was not right," writes an anxious and intelligent mother.

"She had been fond of cereals, but had never tried Grape-Nuts. From reading the account of this predigested food, it seemed reasonable to try Grape-Nuts for her case.

"The results were really wonderful. The little brain that seemed at times unable to do its work, took on new life and vigor. Every morning, now, before going to school, she eats the crisp little morsels and is now completely and entirely well, she seems to have a new lease on life—no more distress in the stomach, nor headache, but sound and well every way." Name given by Postum Co., Battle Creek, Mich. Read the book, "The Road to Wellville," in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

The bill licensing naturopathy reads: "And all other systems and methods of treating the sick and afflicted in California." This includes all legitimate schools of healing not now specifically legalized.

The naturopaths believe in a four-years' course. We believe the Governor, not the medical trust, should dictate the requirements of medical colleges. Every eclectic college, except one in Cincinnati, is now classed as "C," debarring students from taking examinations before the state board, a gross, unreasonable, and unjust discrimination.

We also believe in reasonable reciprocity in medical practice between California and states having an equal or higher standard. We believe each practitioner should be responsible to his association for his conduct, and that association represented upon the state board.

In conclusion we suggest that the first biennial report of the State Board of Control proves conclusively that there is need for an overhauling of the State Medical Board as at present constituted.

The naturopaths have drafted a medical bill (Assembly Bill No. 731) entirely revising the present situation which was presented January 24th, by Senator Henry H. Lyon and Assemblyman Egbert J. Gates carrying the best solution for equal representation to all schools of the healing art including a reciprocity clause with power to issue certificates entirely optional with the State Board of Medical Examiners. This bill will probably be the compromise out of all the medical bills introduced.

Your support of the bill or bills placing the Naturopathic School on equal footing with all other legalized schools is a just demand and earnest request of our membership.

Very truly yours,

ASSOCIATION OF NATUROPATHS OF CALIFORNIA.
GEO. B. ABBOTT, Secretary.

A PHYSICIAN TO DR. OTTO SCHOLZ

The physician who addresses the following letter to Dr. Scholz is an absolute stranger to the latter, which demonstrates that the conscience of the average and honest member of the medical fraternity rebels against the tactics and outrages perpetrated by the New York Medical Society.

DR. OTTO SCHOLZ, CHIROPRACTOR,
142-46 East 27th St., New York City.

My Dear Sir: It was with deep regret that I learned of your having been prosecuted by the County Medical Society of the state of New York, which prosecution I regard as a sort of persecution. The danger in disregarding the lesson which the county society sought to teach you is that you may be subjected to a far greater degree of annoyance and possibly sent to jail. The County Medical So-

society of New York are exceedingly jealous of the special privileges which joy being disturbed by any one who to alleviate human sufferings by contrary to those universally accepted correct method; namely, the drug men.

The state of Pennsylvania, where tise, has many persons who are practising chiropractic, hydrotherapy, pathology, neuropathy, etc., none of whom license and have never applied for one is no one qualified to give a license who have applied and yet they are perturbed by the County Medical Society County of Philadelphia.

I write to inform you of this as Philadelphia seems to be a place at the present where a chiropractor can pursue his professional work, thereby being of great benefit to humanity and incidentally making a respectable living for himself. Come to Philadelphia and practise in peace.

Most respectfully yours,

ALFRED WALTON,

From San Antonio, Texas, we receive the following lines. Needless to criticise them they speak for themselves in burning words.

Dear Doctor Lust: We again send report of the doings of the American Medical Association in the state of Texas, especially San Antonio which is the hotbed of this cileless gigantic trust, W. N. Norwood, of Norwood Institute, which has achieved the fame throughout the country, has received a blow from this heartless monster; also Dr. White, of the French laboratory in San Antonio. Both have appealed the cases.

The grafters and knife wielders of the slaughter pens of the city are the leaders and agents of the medical trust, who are persecuting good citizens for services rendered to an approving public. Mr. Norwood was allowed to produce any testimonials of many patients who were cured at his institution, notwithstanding it is an incorporated chartered establishment. In short it was a regular built scheme to put Dr. White out of business. (Star chamber method!).

Has the time come when the bloody tyrants in all lines of business are masters of the situation. Men of thought and progress who can do something for the world, for suffering humanity, are now being persecuted and persecuted and driven from the field of action so that the professional medical grafters and scheming politicians may have a gigantic graft, our government is a mere chess board on which the political and medical grafters play the game and skin the people.

Respectfully, J. T. ROBINSON, M. D.

The Florida Beacon, Ruskin, Fla., a weekly paper especially for those who desire to make Florida a home and who will find valuable hints in the same.

THE NATUROPATH

~~NATUROPATHIC NEWS~~

The Association of Naturopathic Physicians of California has been very busy this season to get a bill through the California Legislature for a separate Naturopathic Board of Examiners. Although naturopathy is legalized in California since 1907, the conditions are not satisfactory. How can drugless practitioners expect fair treatment from a board that is hostile and cannot see the good in any other school or in any other practitioner? If the naturopaths will not get the legislation to which they are entitled and what they demand by constitutional right in the way of a separate board, they will have the matter taken up through referendum and placed before the people of the State to decide. Other sections of our National Society can learn from the California Association. This is the only way to go about it—a separate board of examiners. How can regular physicians issue licenses for drugless practitioners when they know nothing about this science? Naturopathy is a greater and far better science than the old school medicine. Naturopathy has the better argument, has something for the public that is good and practical in the way of prevention and cure of disease. The time has passed where drugless practitioners will make such concessions as going on the same board.

* * *

The osteopaths who are entitled to register in the State of New Jersey under the new law that went into effect on April 2d should write for their application blank and send same in before July 2d, as after that time no more registration is possible without examination. More about this New Jersey law will be published in the near future.

* * *

The Association of Naturopathic Physicians of Pennsylvania has also a bill going. We have, however, not as yet heard the final results. The naturopathic movement is gaining more and more strength in Pennsylvania, and Pittsburgh seems to be quite alive just at this moment, judging from some literature we have seen recently in regard to a Naturopathic University (?), etc.

* * *

The Association of Drugless Practitioners of the State of Minnesota has changed the name of their association to the Minnesota State Naturopathic Association. A bill was also in the Legislature this winter, and it was defeated on account of the large number of regular medical men who were senators and assemblymen. The new election of officers also took place, and Dr. Lindgren was re-elected president and Dr. O. W. Westlund vice-president and Dr. Ballard secretary. There is no doubt that next winter also their bill will pass. Minnesota has a strong pressure on the people to vote for men who are not prejudiced and who will not discriminate in making laws.

A good many of our readers have become of my great lawsuit with the woman sleuth of the medical society, Francis zigelaus, and in answer to all of their inquiries I want to inform them that I came up about six times in court before Justice Harris and finally a case was made of it and held for the grand jury under of \$1,000. This is exactly what we wanted and in one way we are glad that our case was held, because now we have a fine opportunity to get even with the medical trust and a jury decide whether the people of New York and the drugless practitioners will stand such treatment as they have been receiving in the past. We are collecting material from more than twenty-five cases of this woman who said on the witness stand that "she never said a lie in her life" admitted perjury. Not in one case did she tell the truth. She even admitted on cross-examination in the preliminary trial of this that she intentionally lies; also another detective of the medical clique said the same thing. This in itself is sufficient proof to any jury what kind of work these people are doing and how much trust can be put in their testimony. We will teach these people a lesson once and for all. We are well prepared in this case. We have plenty of money and legal support and we have also to fight with. Money has been offered the editor in this case, where he never expected it, to carry on this fight to a finish. There is a little more involved in this than "criminal libel" or exposing this woman detective. The principles of the right of existence and practice of drugless healing are at stake, and we will fight this affair until the whole question is fully ventilated. I have with express my sincere thanks to all the many readers who have written letters of sympathy and encouragement, and I also want to express my thanks to the men and women who subscribed for a fund at the last meeting of the mechanotherapists. I have never asked a cent for myself, and in carrying on this fight I do not ask for money for myself; I am well able to take care of myself, but this case is not my case; it is the case of every drugless practitioner, the case of every voter and citizen of this State. It is the case of the public at large, to settle the question and for all whether we have any constitutional rights or not to follow our vocation and do good. The jury who will try this case will have to try it as their own case. I have not committed criminal libel; I have only published the truth about this infernal woman about this particular woman detective who has committed perjury and has done it in such a way that she is not within the law and has not acted as an honest detective.

All nature-cure practitioners in Greater New York who were arrested on false evidence by this woman will please communicate with me or with my lawyer, Mr. Newirth, 233 Broadway, New York City.

~~say to the people of New York~~
 practitioners are also human beings
 right to ask the State for protection
 unjust persecution and also to conduct a legal business for an establishment.
 As long as a bath is a crime
 establishment when this woman is so long we will not stop, and
 their "mean and dirty" persecution cannot stand any longer.
 will not be tolerated any longer.
 of New York and in particular
 the editor represents through
 and societies as president of the Naturopathic Federation of America.
 number of incidents in connection
 hearings in the different courts of law have also happened, some part
 nations of some of the officers of the National Society which I will publish a few.
 They are quite serious and important.
 Our readers shall have the benefit of this.
 my case very likely will not come up later in the summer or next October as we need more funds for legal expenses. We ask our readers to contribute to this fund. Without money we cannot carry this fight to a finish. We will never know what the results may be. We wait for the results to be known.
 when taken by a sleuth of the medical society on her own hook constitutes a crime.
 either a man or woman who prepares a bath or whether the proprietor of a bath establishment is a criminal. We want to know here a bath is not a crime, the woman nurse who prepares a bath is not a criminal, but when this woman sleuth of the medical Society comes and takes a bath on her own hook, then a crime is committed. Who is the criminal?
 As long as a bath is a crime, any other drugless application, such as water movements, exercise, vibration or any natural treatment is construed as a crime by the servants of this trust, so we will keep up the fight and we ask readers to help us. I myself cannot do this all alone. I need your co-operation, your moral and financial assistance, and assure you of a great victory in the future, not only in this particular case, but through actions which are being taken by the Legislature and the Senate.

* * *

In some of the States we have some legislative committees that have great work and who deserve the credit and appreciation of every drugless practitioner and of the public at large and every those rights they have been working for those cause they represent.

* * *

In the State of Florida, in the State of Pennsylvania and a few other States the Naturopathic Society has succeeded in killing number of medical bills that were directed against drugless practitioners.

ANOTHER REMARKABLE OPERATION

It is with no surprise—only disgust—that we learn that the Medical Association has asked the city for an additional appropriation of \$116,000 to be devoted to the medical inspection of school children. Yes, the Ancient and Honorable Order of Butinskys, these King Pins of the Universal Society of Busybodies, have decided that the mild and lamblike people of our city should reach way down in their clothes and haul up \$116,000 in order that the spectacled and wise looking M. D.'s (we don't remember whether M. D. stands for Mixed Drinks or Much Dope, but it doesn't matter) may be enabled to "inspect" your children in the public schools so as to force you to patronize them whether you want to or not. The fact that their services are uncalled for, unnecessary and undesired makes no difference to the doctors. Not in the least. Naturally being men of "science" they take the "scientific" view of the case that they must live and the people must pay their expenses whether the people and their children live or not. If a few thousand children, more or less, die as a result of vaccination poisoning and unnecessary operations and a few thousand more have their health permanently ruined from poisonous drugs and filthy serums, that is a mere trifle; the Brotherhood of the Bloody Knife and Poison Pill must get money somehow. Otherwise, they may starve, which would be horrible to contemplate. Don't you just hate to think of it? You must appreciate this point before you can become a "cheerful giver" in this case.

Doctors, you know, are strong on Diagnosis, especially when they diagnose the case of Mr. American Public whom they have decided is suffering from a virulent attack of Enlightened Thought. One of the symptoms is that the patient has got the horrible notion into his head that the doctors are more or less fakes. Quick; hand me that knife! An operation is necessary immediately. The operation they have decided on consists in cutting out a liberal portion of a gland on the inner side of the pants pocket vulgarly known as the Purse. The profits derived from this operation are to be devoted to the medical inspection of school children.

It works this way. The doctor goes to the school, examines, or pretends to examine your child and then writes on his card, "You must have these tonsils cut out" or, "These adenoids must be removed." Of course to have this done you will have to go to a doctor who, after butchering your child in the latest and most approved manner, will cheerfully pass a bill for an exorbitant figure which you, of course, will pay with equal cheerfulness and alacrity.

That is, it will work this way unless the people rise up and treat the Medical Trust to a vigorous massage with the toe of the boot about the shoulders of the pants, proclaiming their right to Medical Freedom to which they are just as much entitled as they are to religious freedom.

XASSOCIATION OF NATURO-PATHS OF CALIFORNIA

The annual meeting of the Association of Naturopaths of California was held October 11, 1913, resulting in the following elected officers for the ensuing year:

President, Dr. Carl Schultz; secretary, Dr. August Greth; treasurer, Dr. Henry Gross; financial secretary, Dr. Peter Olson; first vice-president, Dr. Frank L. Wilson; second vice-president, Dr. F. W. Binford; third vice-president, Dr. Chas. I. White; fourth vice-president, Dr. Harry D. Reynard; fifth vice-president, Dr. A. O. Lindstrom; sixth vice-president, Dr. Margaret Goettler.

A committee was appointed to find ways and means for handling new members and outside members.

Resolutions were sent to the Governor protesting that no representative from the Naturopathic School was appointed upon the State Medical Board.

There were many subjects discussed at length and a liberal exchange of views regarding the necessary steps to be taken to build up the association. All present seemed to realize the importance of standing together and taking up new ideas regarding methods of providing for the membership and financing a "Protective Fund," and the needs of boosting for Naturopathy and the association and to prevail upon delinquent members to pay up and become in good standing in view of the mutual benefit and the great necessity of standing together for the conditions arising.

There was one hundred dollars voluntarily subscribed for the "Protective Fund" and the board is anxiously awaiting contributions from the other members.

A vote of thanks was tendered to Dr. Abbott, retiring secretary, for the good and efficient services rendered by him while in office.

Dr. Schultz read a most instructive paper upon Hydrotherapy in which the meeting took extreme interest and proposed a vote of thanks for his earnestness and labor in preparing the same.

THE QUESTION BOX

On account of many important matters in this issue, we were unable to procure space for The Question Box, which will appear in our next issue.
